Acudor Fire Rated Access Panels

Are you looking for Acudor Fire Rated Access Panels? No problem. We have all the information you need to make the right purchase. Our wide range of options covers all types of applications and meets most testing requirements. Our doors have been used for a multitude of projects such as hotels, condominiums, casinos, and more.

Perhaps you need easy access to plumbing, electrical, mechanical, or security areas, then our access doors are perfect for this. They are sleek and aesthetically pleasing while still offering the required safety measures. We always note that specific customizations made to our doors can lead to varying results because they have not been tested as such to meet the required standards. You can always speak to one of our representatives if you have more questions before placing your order. We always want you to feel confident in your choice.

If you simply need a fire-rated uninsulated access door, then our FB-5060 is the right pick. We also offer the FB-5060-DW and the FB-5060-TD which are for drywall walls and tile walls respectively. However, our FW-5050 access door models are insulated. We also offer drywall and an upswing door for ceiling variants (the FW-5050-DW and FW-5050-UP respectively). Finally, our FW-5015 is specifically made to be concealed in drywall walls while the FWC-5015 is made for drywall ceilings, also with the purpose of also being concealed.

Whether you need them for residential or commercial purposes, know that you can count on Acudor Fire Rated Access Panels to get the job done. Take a look at our wide selection of top-quality access panels and choose the one that is best for your application. If you are still unsure, you can always contact us to request more information. Our customer service team is ready to answer any questions concerning our access products. Get started with Acudor today!
