
Optimizing Rooftop Safety with Acudor's Precision

-Engineered Roofing Safety Accessories

In the construction and building maintenance industries, rooftop access is essential—but it comes with inherent risks. Whether it's for HVAC servicing, solar panel installation, or routine inspections, ensuring worker safety on rooftops is non-negotiable. Acudor's line of roofing safety accessories offers durable, code-compliant solutions engineered for maximum protection and performance.

Acudor's Commitment to Rooftop Safety

For over three decades, Acudor has been a trusted name in access products. Our roofing safety accessories are designed to complement our robust lineup of roof hatches, ensuring that each component of your rooftop access system works seamlessly to protect personnel and meet regulatory standards.

Acudor safety accessories are built with the same attention to quality and compliance as our flagship roof hatches and are compatible with a wide range of roofing systems.

Roofing Safety Accessories Offered:

1. **Roof Hatch Safety Railings (RHSR Series)**
   - **Function:** Provides a secure, OSHA-compliant barrier around the roof hatch opening.
   - **Features:**
     - Heavy-duty steel construction with a corrosion-resistant yellow powder-coated finish.
     - Quick and easy installation with no roof penetration required.
     - Self-closing safety gate for added fall protection.

These guardrails are essential for any building with frequent rooftop access, reducing fall hazards and enhancing compliance with OSHA 1910.28 standards.

2. **Roof Hatch Safety Grab Bars (SLE-Y Series)**
   - **Function:** Assists with safe ingress and egress through roof hatches.
   - **Features:**
     - Constructed from durable tubular steel.
     - Installs directly to the inside of the roof hatch curb.
     - Designed to meet OSHA requirements for ladder access safety.

Grab bars provide stable handholds for workers transitioning between ladders and rooftops, minimizing slips and missteps.

3. **Ladder Post Safety System (TSP-1 Series)**
   - **Function:** Offers a retractable post for enhanced ladder access safety.
   - **Features**
     - Telescoping design locks into place for secure use.
     - Stainless steel or aluminum construction available.
     - Spring-assisted operation for smooth deployment and storage.

The TSP-1 Series enhances ladder safety by giving workers a sturdy, elevated grip point while climbing on or off a fixed ladder.

Engineered for Compliance and Durability

All Acudor roofing safety accessories are manufactured with strict adherence to OSHA and ANSI safety guidelines. Our designs emphasize both ease of installation and long-term durability, making them ideal for commercial buildings, industrial facilities, and institutional campuses.

Optimizing Safety Without Compromising Access

When paired with Acudor roof hatches—available in galvanized steel, aluminum, and stainless steel—our safety accessories form a complete rooftop access and protection system. This integrated approach ensures you don't have to compromise between accessibility and safety.

Why Choose Acudor?

- **Proven Expertise:** Over 30 years of industry leadership in access products.
- **Code Compliance:** Products engineered to meet or exceed OSHA standards.
- **Unmatched Durability:** Built with high-quality materials for long service life.
- **Installation Support**: Easy-to-follow instructions and expert customer service.

Get Started with Safer Rooftop Access Today

Whether you're specifying access products for a new construction project or upgrading existing infrastructure for code compliance, Acudor's roofing safety accessories offer the performance and peace of mind you need.
